**AuSable Township Resident,**

**You are receiving this letter because you have property with a permanent structure in the scope of our Drinking Water State Revolving Fund project. This project involves extension of our municipal water main to your area. We have received updated information that the project will now be paying for the hookup from the meter pit to your home. This information does come with the condition that your existing well must be abandoned.**

**If you have already had contact with our office and signed a form stating that you were interested in getting hooked up to municipal water, no further action is required, and you are on our list for hookup. If you are not signed up for hookup and decide to participate in the project with the updated information on the project paying for the hookup, please contact our office and speak with our staff regarding the next steps needed.**

**This offer for hookup is a one-time offer and will not be extended after the project is completed. Please contact our office if you have any questions regarding this project.**

**Eric Strayer**

**Superintendent**

**AuSable Township**
